ALUMNI NEWS

Class of 1960

As a continuing alumni feature the *ISU Veterinarian* is in this issue featuring the graduating class of May 28, 1960.

We have received 29 replies from the 59 inquiries distributed. Of those responding, 17 are in large animal practice, 4 are in small animal practice and 1 is in a mixed practice. Four are associated with universities in teaching and research positions and 3 are working for the federal government in the meat inspection division. One member of the class of 1960 is a consultant dealing with swine nutrition. Two of those responding have received their Doctor of Philosophy degrees. All of the 29 graduates responding are married and to these families a total of 89 children have been born for an average of a little over three per family.

We are still quite interested in receiving replies from the remaining members of the class of 1960. Due to address changes not reported to the university some of the remaining members of the class may have not received a questionnaire. These individuals should feel free to send us a brief resumé of their activities of the last 10 years. These, along with other replies received, will be printed in a future issue. Please send replies in care of the Alumni Editor, *ISU Veterinarian*, College of Veterinary Medicine, Iowa State University, Ames, Iowa 50010.
